

Solenoid valve (three-port and two-position) 3V200 series

Symbol

Product Performance

1. It has the guide mode, and the external and internal parts are optional;
2. With the sliding column type structure, it has good sealing performance and sensitive response;
3. The double-end solenoid valve has the memory function;
4. The inner hole is applied with special processing technology, which has small friction resistance, low starting pressure, and long service life;
5. It has no oil filling and lubrication needs;
6. It is attached with manual device, which is convenient for installation and debugging;
7. There are a number of standard voltage grades for selection and use;
8. With the valve group integrated with base, it can save installation space.

Flow characteristics

Model : 3V210-08-NO

Specification

Model	3V210-06	3V220-06	3V210-08	3V220-08
Working Medium	Air(to be filtered by40μmfillter element)			
Action Mode	Guide -Type			
Port size①	Air Inlet=Air Outlet=PT1/8		Air Inlet=Air Outlet=PT1/4	
Effective Sectional Area	14mm ² (Cv=0.78)		16.0mm ² (Cv=0.89)	
Position number	Three-port and two-position			
Lubrication②	Not required			
Working pressure range	0.15~0.8MPa(21~114psi)			
Guarantee pressure resistance	1.5MPa(215psi)			
Working temperature℃	-20~70			
Body material quality	Aluminum alloy			

①The port thread forms of NPT and G are available.

②Oil filling and lubrication can't be stopped in the half way. L ISO VG32 or equivalent lubricating oil is recommended.

Coil specification

Item	Specific parameters				
Standard voltage	AC220V	AC110V	AC24V	DC24V	DC12V
Operating voltage range	AC : ±15%		DC : ±10%		
Power consumption	AC : 3.5VA		DC : 3.0W		
Protection grade	IP65(DIN40050)				
Heat resistance grade	B Class				
Power on type	DIN socket type and outlet type				
Excitation time	0.05sec and below				
Highest actuation frequency①	5 cycle/sec				

③The highest actuation frequency is a no load state.

Finished product ordering code
